-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2 and 4-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Morita (USPN 5229905). Morita teaches the claimed process as evidenced by figs 1-7. It should be noted that window 6 overmolds part of body 2a.

3. Claims 1-2 and 4-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Morita (USPN 5094602). Morita teaches the claimed process as evidenced by figs 1-6. It should be noted that the window overmolds part of the body.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Morita (USPN 5229905). The above teachings of Morita are incorporated hereinafter. Morita, however, does not teach injecting the opaque component in a first mold and then injecting the colored component in a second mold. The use of separate molds to mold composite articles is well-known in the molding art. See class 264, subclass 250. Thus, it would have been obvious to one of ordinary skill in the art at the time the

invention was made to use separate molds for molding the body and the window of Morita in order to increase molding cycle by freeing up a mold.

6. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Morita (USPN 5094602). The above teachings of Morita are incorporated hereinafter. Morita, however, does not teach injecting the opaque component in a first mold and then injecting the colored component in a second mold. The use of separate molds to mold composite articles is well-known in the molding art. See class 264, subclass 250. Thus, it would have been obvious to one of ordinary skill in the art at the time the invention was made to use separate molds for molding the body and the window of Morita in order to increase molding cycle by freeing up a mold.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. USPN 5472655 teaches the use of separate molds to mold the body and window portions of an article.
